A Clinical Trial for Patients with Moderately to Severely Active Crohn's Disease

VTX958-202 is a clinical trial for patients with moderately to severely active Crohn's Disease. The goal of this trial is to evaluate the safety and efficacy of an investigational study drug.

The investigational study drug (**VTX958**) in this study is:

- taken orally in a tablet form, and
- is tested in people who have not responded well to conventional treatment, like corticosteroids, or biologics.

To learn more about the VTX958-202 study, please contact the site staff below, and they can help determine your eligibility.
